ESSAY TITLES**

Choose one title from the following options and write an essay (2000 words)

Title: Write an apologetic essay to support creation

Note: The student would be required to research the topic well, not only providing a case for refuting the theory of evolution but also building a solid case for creation.

Title: Biographical essay on the life of a notable scientist

Note: Describe their area of research and the impact their invention or discovery has made or is making in the 21st century. Their personal character and their belief in God would be an expected component of this essay.

Title: Research the discovery of an important pharmaceutical chemical.

Note: Such chemicals could include plant-derived compounds such as aspirin or those obtained from bacteria or moulds such as penicillin. The essay should include its discovery, laboratory purification, industrial preparation, commercial exploitation and medical benefits.

Title: Research the occurrence of the mathematical Fibonacci series in biology

Title: Research into a branch of science not found in the science curriculum.
